**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

## Office Action Summary

Application No.

10/786,627

Applicant(s)

BALES ET AL.

Examiner

TuyetLien (Lien) T. Tran

Art Unit

2179

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 September 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-66 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-66 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 9/26/07.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

Art Unit: 2179

### DETAILED ACTION

1. This action is responsive to the following communication: Amendment filed 09/20/07. **This action is made final.**
2. Claims 1-66 are pending in the case. Claims 1, 18, 33 and 50 are independent claims.

### *Double Patenting*

3. Claims 30-32 of co-pending application No. 10/786742 were cancelled; therefore, the previous rejection is withdrawn.

### *Claim Objections*

4. Applicant's amendment corrects the previous objection and therefore, the previous object is withdrawn.
5. Claim 18 is objected to because the term "computer-enables" should be changed to "computer-enabled". Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
7. **Claims 22, 27 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

In claims 22 and 27, a "third user interface" is recited twice in the claim; it is not clear whether there are two user interface or there is only one user interface is operable

Art Unit: 2179

to perform two functions (note independent claim 18 already comprises a third user interface as recited in line 5 of the claim).

In claim 28, "the third user interface" is recited; however it is not clear whether the interface refers to the first third user interface or the latter one (note there are two "third user interface" recited in claim 27).

***Claim Rejections - 35 USC § 101***

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. **Claims 1-32 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.**

As to claims 1 and 18, an "interactive tool" is recited. However, it appears that the tool would reasonably be interpreted by one of ordinary skill in the art as software, per se. Therefore, the tool as claimed in claims 1 and 18 would reasonably be interpreted by one of ordinary skill in the art as functional descriptive material. The functional descriptive material are nonstatutory when claimed as descriptive material per se, 33 F.3d at 1360, 31 USPQ2d at 1759.

Claims 2-17, 19-32 are rejected as incorporating the deficiencies of a claim upon which it depends.

***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

Art Unit: 2179

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**11. Claims 1-2, 6-11, 13-19, 23-27, 29-34, 38-43, 45-51, 55-60, 62-66 are rejected under 35 U.S.C. 102(e) as being anticipated by Chowdhry et al (Pub No US 2003/0167315 A1; hereinafter Chowdhry).**

***As to claims 1, 33 and 50***, Chowdhry discloses:

A machine readable medium having instructions stored thereon that when executed by a processor cause a system to provide a computer-enabled interactive tool that can configure a portal (e.g., see Figs. 1, 3 and [0001]), comprising:

a first user interface operable to manage the portal (e.g., see Fig. 10);

a second user interface operable to manage personalization of the portal (e.g., see Fig. 15 and [0101]);

wherein the portal operates to include a desktop and associated desktop resource that includes at least one of the following portal resources: a book, a page, a portlet, a shell, a look & feel, a theme, a menu, and a layout; and wherein portal resources are associated with the desktop manually (e.g., see Fig. 3 and [0101]; note that a user select any web-enabled object for use in populating his/her custom portal; a user can further position a portlet at any location within the portal, see [0006]; further note that a desktop is defined as a portal as described in the Applicant's specification paragraph [0037]).

***As to claim 18***, Chowdhry discloses:

A computer-enabled interactive tool for configuring a portal (e.g., see Fig. 3 and [0001]), comprising:

a first user interface operable to manage the portal (e.g., see Fig. 10);

a second user interface operable to manage personalization of the portal (e.g., see Fig. 15 and [0101]);

a third user interface operable to manage entitlements for at least one portal resource (e.g., see [0230], [0247], [0255], [0260]);

wherein an entitlement determines what capabilities are available to a portal visitor for the at least one resources based on visitor roles of the portal visitor (e.g., see [0230], [0247], [0255], [0260]); and

wherein the portal operates to include a desktop and associated desktop resource that includes at least one of the following portal resources: a book, a page, a portlet, a shell, a look & feel, a theme, a menu, and a layout; and wherein portal resources are associated with the desktop manually (e.g., see Fig. 3 and [0101]; note that a user select any web-enabled object for use in populating his/her custom portal; a user can further position a portlet at any location within the portal, see [0006]; further note that a desktop is defined as a portal as described in the Applicant's specification paragraph [0037]).

***As to claims 2, 19, 34 and 51,*** Chowdhry further discloses at least one user interface operable to manage one of: a desktop, a book, a page, a portlet, a shell, a look and feel, and a layout (e.g., see Figs. 30, 43).

***As to claims 6, 23, 38 and 55,*** Chowdhry further discloses the portal can be depicted graphically as a hierarchy of the at least one portal resources (e.g., see Fig. 43).

***As to claims 7, 24, 39 and 56,*** Chowdhry further discloses the first user interface includes a context-sensitive editor (e.g., see Fig. 10).

**As to claims 8, 25, 40 and 57**, Chowdhry further discloses the first user interface includes a hierarchy browser (e.g., see Fig. 43).

**As to claims 9, 41 and 58**, Chowdhry further discloses an entitlement determines what capabilities are available to a portal visitor for the at least one resources (e.g., see [0230], [0247], [0255], [0260]).

**As to claims 10, 26, 42 and 59**, Chowdhry further discloses an entitlement is based on a user role (e.g., see [0230], [0247], [0255], [0257], [0260]).

**As to claims 11, 27, 43 and 60**, Chowdhry further discloses a third user interface operable to manage content (e.g., see Fig. 43); and wherein content is part of a virtual content repository (VCR) (e.g., see Fig. 43 and [0087], [0097], [0110], [0230]).

**As to claims 13, 29, 45 and 62**, Chowdhry further discloses a portlet can dynamically present content (e.g., see Fig. 3).

**As to claims 14, 46 and 63**, Chowdhry further discloses a fourth user interface operable to manage entitlements for at least one portal resource (e.g., see [0230], [0247], [0255], [0260]); and wherein an entitlement determines what capabilities are available to a portal visitor for the at least one resources (e.g., see [0230], [0247], [0255], [0260]).

**As to claims 15, 30, 47 and 64**, Chowdhry further discloses the second user interface is operable to manage a content placeholder (e.g., see Fig. 15).

**As to claims 16, 31, 48 and 65**, Chowdhry further discloses the second user interface is operable to manage a content selector (e.g., see Fig. 43).

Art Unit: 2179

**As to claims 17, 32, 49 and 66**, Chowdhry further discloses a fifth user interface operable to manage delegated administration (e.g., see [0092], [0230], [0247], [0255]).

***Claim Rejections - 35 USC § 103***

12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

13. **Claims 3-5, 20-22, 35-37, 52-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chowdhry in view of Poulsen (Patent No US 7062511 B1; hereinafter Poulsen).**

**As to claims 3, 20, 35 and 52**, Chowdhry teaches the limitations of claim 2, 19, 34 and 51 for the same reasons as discussed above. Chowdhry does not expressly teach that a desktop can be defined based on a template.

Poulsen, though, teaches a portal web site development system that allows a user to define or manage the portal web site (e.g., see Abstract and Fig. 7) where a user can define a desktop based on a template (e.g., site theme, see Fig. 4E and Fig. 6; note

Art Unit: 2179

that a desktop is defined as a portal as described in the Applicant's specification paragraph [0037]).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the web site development system as taught by Poulsen to the interactive tool as taught by Chowdhry to provide the ability to allow a user to apply a template to his/her customized web portal and to achieve the claimed invention. The motivation for the combination is to allow an end user to define and manage customized web portal easily and efficiently without requiring deep knowledge in web development.

***As to claims 4, 21, 36 and 53,*** Poulsen further teaches a desktop is a user-specific view of a portal (e.g., see Fig. 4E). Thus, combining Poulsen and Chowdhry would meet the claimed limitations for the same reasons as discussed with respect to claims 3, 20, 35 and 52 above.

***As to claims 5, 22, 37 and 54,*** Poulsen further teaches:

a third user interface operable to define and/or manage a desktop (e.g., see Fig. 4E and Fig. 6); and

wherein the third user interface can render a preview of the desktop (e.g., see Fig. 4E).

Thus, combining Poulsen and Chowdhry would meet the claimed limitations for the same reasons as discussed with respect to claims 3, 20, 35 and 52 above.

**14. Claims 12, 28, 44, 61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chowdhry.**

Art Unit: 2179

**As to claims 12, 28, 44 and 61**, Chowdhry teaches the limitations of claim 11, 27, 43 and 60 for the same reasons as discussed above. Chowdhry further teaches that a user can drag and drop a portlet from the repository into a page to customize the portal web page (e.g., see Fig. 43, [0234], [0238], [0247]); Chowdhry further teaches that an administrative console can be used to manage the repository (e.g., see [0230], [0247]. Chowdhry does not expressly teach that modifying the VCR by dragging and dropping VCR nodes; however, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have implemented this feature in view of Chowdhry because Chowdhry suggests to the skill artisan that the administrator can manage and modify the repository and that a drag and drop operation can be used to customize a web portal page (e.g., see Fig. 43, [0234], [0230], [0238], [0247]). The motivation is to make it easier and convenient for a user to manage the repository by simply dragging and dropping a graphical object from one place to another.

### **Response to Arguments**

15. Applicant's arguments with respect to claims 1-66 filed on 09/20/2007 have been considered but are not persuasive.

♦ In response to Applicant's arguments that the "third user interface" as recited in claims 22 and 27 are different and each "third user interface" refers to a separate user interface that is additional to the two user interfaces in the independent claim 18 (e.g., see Applicant's remake page 13, second paragraph), the examiner notes that independent claim 18 already comprises a third user interface as recited in line 5 of the claim. Therefore, it is not clear whether there are two user interfaces or there is only one user interface is operable to perform two functions.

Art Unit: 2179

♦ In response to Applicant's arguments that the "computer-enabled interactive tool" as recited in claims 1 and 18 satisfies the statutory requirement under 35 USC 101 (e.g., see Applicant's remark page 13, third paragraph), the examiner respectfully submits that the interactive tool would reasonably be interpreted by one of ordinary skill in the art as software, per se. Therefore, the tool as claimed in claims 1 and 18 would reasonably be interpreted by one of ordinary skill in the art as functional descriptive material. The functional descriptive material are nonstatutory when claimed as descriptive material per se, 33 F.3d at 1360, 31 USPQ2d at 1759.

♦ In response to Applicant's arguments that the prior art of Chowdhry fails to teach the portal that operates to include a desktop and associated desktop resources, especially wherein portal resources operates to be associated with the desktop manually (e.g., see Applicant's remark page 13, paragraph 9), the examiner respectfully submits that Chowdhry teaches a method, system and a computer program product for the custom design of web portals by user; wherein the user is able to select any web-enabled object for user in populating his/her custom portal; Chowdhry further teaches that a portal, which includes a plurality of portlets, provides the user with the flexibility to personalize the look and feel of the pages they view as well as the specific content presented in his/her pages (e.g., see [0006], [0101], [0102]). In addition, a desktop is defined as a portal as described in the Applicant's specification paragraph [0037]. Therefore, the examiner concludes that the prior art of Chowdhry does teach the limitations of the portal that operates to include a desktop and associated desktop resources, especially wherein portal resources operates to be associated with the desktop manually.

Art Unit: 2179

♦ In response to Applicant's argument that the prior art of Chowdhry fails to teach an entitlement that determines what capabilities are available to a portal visitor for the at least one resources based on visitor roles of the portal visitor (e.g., see Applicant's remark page 14, paragraph 3), the examiner respectfully disagrees and submits that the prior art of Chowdhry teaches at least on entitlement that determines what capabilities are available to a portal visitor for the at least one resources based on visitor roles of the portal visitor (e.g., the administrative console, the user interface, the URL generator determine capabilities are available to a portal user, see [0229], [0230], [0233]; note that when the user account is setup by an administrator, the user is placed in a user group, and each user group has a default page associated with it, see [0260]). In addition, it is noted that the features upon which applicant relies (i.e., one user can be assigned a different type of entitlement based on the different role the user is undertaking, internal or external) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Art Unit: 2179

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

It is noted that any citation to specific, pages, columns, lines, or figures in the prior art references and any interpretation of the references should not be considered to be limiting in any way. A reference is relevant for all it contains and may be relied upon for all that it would have reasonably suggested to one having ordinary skill in the art. In re Heck, 699 F.2d 1331, 1332-33, 216 USPQ 1038, 1039 (Fed. Cir. 1983) (quoting In re Lemelson, 397 F.2d 1006, 1009, 158 USPQ 275, 277 (CCPA 1968)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TuyetLien (Lien) T. Tran whose telephone number is 571-270-1033. The examiner can normally be reached on Mon-Friday: 7:30 - 5:00 (every other Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on 571-272-4847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
